PROPERTY DESCRIPTION

Large and elegant, nearly new DR Horton-built masterpiece features soaring Cathedral ceilings and most every upgrade offered at a value price. Pulling up to the home, you'll notice the large picture window set with an arch and stone accents. Coming through the leaded-glass door, you'll see the tiled floor and an open area between the bedrooms on the left, and the huge, open living area on the right. There is also an arched art niche area to showcase your favorite picture or decorations. Walking to the living area side of the home, you'll be impressed with how light, open and airy the home feels. There is a formal dining area and eat-in kitchen, and a huge wall for the biggest furniture. The kitchen is open to the living area and dining areas, with a large wrap-around breakfast bar. The walls feature two-tone paint, and the white accents give the home a very elegant feel. There is a big pantry with a lot of shelving for extra storage. A smooth-top stove, tiled backsplash finish out the kitchen. The other rooms in the home are of good size, and it can be configured as a 3 bedroom, 2 dining, 2 living home, or a 4 BR, 2 dining, 1 living—as one of the rooms in currently configured as an office. There are plantation blinds, raised panel doors and ceiling fans throughout the home. The Master BR also has Cathedral ceilings, with a very unique angular treatment to the ceilings. It is a big room, and the double doors lead from the room into the bathroom. In the bath, there is a garden-sized tub, dual vanities, and a big linen closet with tiered shelving for more extra storage. The home is privacy fenced, with a larger yard, and it has a security system.
